Slate verge trim

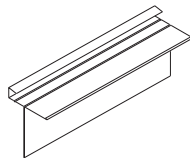

for fibre cement and Melbourn slates

Marley Eternit are adding this new and easy to fix Slate verge trim manufactured from durable aluminium to their extensive dry fix range of ventilation and finishing systems.

Simply nailed direct to the roofing battens then held in place beneath the verge slates, this product is extremely fast to install, requiring no mortar, is totally weather tight and gives an elegantly simple, clean look to the verge.

Melbourn slates verge trim (3m x 8)
(code MA42203)

Fibre cement slates verge trim (3m x 8)
